ATV/UTV Riders: Think Smart Before You Start This Summer

Remember to wear a helmet and seat belt and practice safety while riding an ATV or UTV this summer.

MADISON, Wis. – The Wisconsin Department of Natural Resources (DNR) reminds operators of all-terrain vehicles (ATV) and utility terrain vehicles (UTV) to think smart before they start this summer by following safety best practices.

A lack of safety equipment is the leading cause of ATV/UTV incidents. When enjoying off-road rides and adventures, wearing a helmet and seat belt, monitoring speed, and using caution on hills and uneven terrain could save your life.

So far this year, six people have died in ATV/UTV crashes. [Most crash victims were not wearing seat belts or helmets.](#)

Lt. Martin R. Stone, DNR Off-Highway Vehicle Administrator, says operators must remember the ATV or UTV is not built like other popular recreational vehicles – such as motorcycles or even bicycles – and knowing how to safely operate these machines is necessary.

“These off-highway machines come with big tires,” Stone said. “These cannot turn on a dime and can rollover if that’s attempted. Knowing how to be a smart and safe operator is a necessary part of the fun to be had on the trails. Watch your speed, wear a helmet, share the trails and you’ll come home with fun stories about your ride.”

Follow these tips for a safe ride:

- Never consume alcohol or drugs before or during your ride.
- Wear a seat belt and a Department of Transportation (DOT)-approved helmet.
- In addition to a seat belt and helmet, wear protective clothing such as eye protection, gloves, long pants and a long-sleeved shirt.
- Keep your speed in check for the terrain, visibility conditions and your experience.
- Remember that some terrain in Wisconsin is too steep for ATV/UTVs. Please be careful while traversing hills or uneven terrain.

Know before you go. Review all ATV/UTV laws [here](#).

One of the best things ATV and UTV operators can do to operate safely is to take an online safety course. [A list of approved safety education classes is available on the DNR Safety Education webpage.](#)

ATV and UTV operators born on or after Jan. 1, 1988, who are at least 12 years old for an ATV (and at least 16 years old for UTV) must complete an ATV safety certification course to operate in Wisconsin (exception: on private property owned by operator's immediate family).

Wisconsin law requires every operator involved in a crash incident to report the incident without delay to law enforcement officials. In addition, within 10 days of the incident, the operator must submit a [written report to the DNR](#).
